

Labs 13-14

13. (***) Create an app that reads and parses XML content from address <http://users.metropolia.fi/~peterh/players.xml>. In your application create Player objects and Players object (which holds all the player objects in it). Print the collection to either TextView or Log. Follow tutorial at <http://developer.android.com/training/basics/network-ops/xml.html> .
14. (*) Create an app that reads and parses (partially) Yle News RSS feed at <http://yle.fi/uutiset/rss/uutiset.rss?osasto=news> . Parse at least stream title and description and for each item title, link, description and publication date parts.

(***) Mandatory, later labs depend on this.

(*) Not obligatory, bonus points only.
