

Labs 15-17

15. (**) Create an app that displays in a list view the Players collection created in lab 13. Create an adapter by subclassing BaseAdapter and implementing ListAdapter interface.
16. (**) Add to lab 15 possibility to create a new player. (Use separate activity, and adopt observer pattern to get the list view updated accordingly. Tips: `runOnUiThread()` and `notifyDataSetChanged()`)
17. (*) Read player data from network periodically and update list view when new player(s) are added to players collection.

(**) Double points

(*) Not obligatory, bonus points only.
